**ABOUT US. CQR COMPANY.**

# ABOUT US

We are the team. We have been working for more than 10 years. We have experts in security , programming , design, monetization , usability, front-end, seo, ppc, analytics etc.

We have approximately 12 years of experience in creating this tool and we fully understand how it should work and what it should do based on our errors and experience we got.

All these years we did not show this idea to the public and used this tools inside the company waiting for this tool to become perfect.

We invested our own money in this project and fully understand how hard to abandon every release if it is bad, but now we are ready and we want to make the best tool on the internet for sure.

We started our company in 2006, working in IT Security areas and Web Development. After a few years we registered a trademark and started to work in all IT areas: development, marketing, security, design, showing our talent in all IT areas.

The work of our team is to provide full service. Our friendly team uses the latest technology and we have our own web vulnerability scanner.

Now, during an information society, information security has become a necessity. Today, security of your project is an important part of running a successful and safe business.

*We will help you secure your website or a local network of the enterprise.*

*All our employees are highly experienced and certified and we will be glad to show you our skills and experience.*

*As long as we will be using our private project we will be integrating some smart penetration testing audits in order to help manual testing with automation.*
